you say

hey first update the retry handler so it only retries 429s then keep the session active and finally run the websocket tests before pushing

clear

the full instruction, plainly.

Hey, first update the retry handler so it only retries 429s, then keep the session active, and finally run the websocket tests before pushing.

concise

the fewest words that still say it.

Hey, first update the retry handler so it only retries 429s, then keep the session active, and finally run the websocket tests before pushing.

structured

goal, changes, validation.

Goal

Update the retry handler so it only retries 429s.

Changes

- Keep the session active.

Validation

- Run the websocket tests before pushing.
